

Women for Market Uptake of Renewable Heating and Cooling

We aim to assist the **scaling-up of women's involvement** in the market deployment and uptake of Renewable Heating and Cooling (RHC) solutions.

We are developing **hands-on market uptake support services**, adapted to women's challenges and tested and validated **across 8 European countries**.

We support **50 European RHC projects** led by women.

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 952874

W4RES Regional hubs act as channels for the delivery of support measures for furthering the uptake of RHC solutions for increasing the involvement of women in the sector.

Support measures to boost the RHC market

- Hands-on market uptake support services,
- Capacity building services,
- Regional awareness raising campaigns,
- Hackathons, capacity building and mutual learning activities,
- Policy recommendations, W4RES Replication Guide and Toolkit.

A global online hub for engagement and exchange, showcasing:

- National RHC networking initiatives,
- Project findings and tools,
- Best practices,
- Co-creation activities and interactive forum.
